

# VISION

**ILIGAN is envisioned to become a beautiful and dynamic industrial and disaster-prepared metropolitan city where God-loving, healthy and culturally-diverse people excel globally, governed with transparency, live in harmony with nature and resilient to climate change.**

## MISSION :

- To make the culturally-diverse people of Iligan City a healthy, God-loving and globally competitive individuals living in a just society.
- To sustain Iligan as an industrial and commercial city and advance its potentials on agriculture, tourism and information and communications technology.
- To properly manage the resources of the city and promote ecological consciousness among the people.
- To carry out transparent and accountable governance characterized by a simple and efficient systems and procedures known and understandable by the general public.
- To build the resiliency of the city through capacity building and institutionalization of disaster risk reduction and climate change adaptation and management in all levels of governance.
